Multidisciplinary Obstetric Maternity Skills (MOMS) Course

This is the first full platform simulation course that has been introduced as part of the mandatory training for all trainees and maternity teams in the U.K. Confidential Enquiries (CEMACH 2007) has estimated that almost a half of all maternal deaths could be prevented with better care. Enquiries into poor perinatal outcomes have identified common errors in the management of patients: confusion in roles and responsibilities, lack of cross-monitoring, failure to prioritise and perform clinical tasks in a structured coordinated manner, poor communication, poor teamwork, poor evidence base and lack of organisational support.

DAY ONE consists of lectures and open group discussions in the morning and small group practical stations in the afternoon. The sessions will focus on core propositional knowledge for emergency maternity situations.

Traditionally, the focus of training has been around the acquisition of knowledge and not on how well this knowledge is practiced.

DAY TWO of the MOMS course will re-orient a student’s view of knowledge from ‘knowing that’ to ‘knowing how’.

Learning is a social and collaborative activity. The course helps to recognise the significance of collaboration within our maternity community and provides an environment in which each individual is valued. These principles are used in developing multidisciplinary team working during simulation. The course has not only received a good reaction but has led to behaviour change, better teamwork and situational awareness.

DAY THREE will concentrate on “Training the Trainer”. Participants showing potential as trainers will be identified on Day 2 for this training session.

PROGRAMME CONTENT

**DAY 1**
- Registration
- Introduction (Faculty and course)
- MCQ
- Communication and Teamwork
- Identifying the Unwell Patient
- Identifying the Unwell Patient Workshops (Partograms, MEWS, Fluid balance & SBAR)
- Maternal Basic Life Support (lecture and demo)
- Newborn Life Support (lecture and demo)
- Skill Stations
  - Newborn Life Support
  - Maternal Resuscitation
  - Evaluate and Close

**DAY 2**
- Antepartum and Postpartum Haemorrhage
- Severe Pre-eclampsia and Eclampsia
- Cord Prolapse
- Sepsis and Sepsis Workshop
- Skill Stations
  - Shoulder Dystocia
  - MOH
  - Breech
  - Eclampsia
  - Mega Simulation
  - MCQs
  - Evaluation and Presentations

**DAY 3 – MOMS Train the Trainer** (only for participants identified as potential trainers)
- Introduction and Course Review – Assessment process
- Theory of Practice in Education
- Lectures – Presentation and Demonstration
- Lecture Workshops
- Small Group Work Stations
- Simulation
- Skills – Presentation and Demonstration – 4 Stage Technique
- Skill Stations 1, 2, 3 and 4
- Evaluate and Close – Allocation to MOMS Course
